

# Building Department Management System (BDMS)

AppStudio's Building Department Management System (BDMS) integrates Property Information, Contacts, Permits, Inspections, Planning and Zoning, Plan Reviews, Occupational Licenses and Code Enforcement in one easy-to-use program.

## AppStudio Overview

AppStudio employees have been developing applications for federal and local governments for over 11 years. AppStudio programs are non-proprietary and run under all versions of Microsoft Windows.

## Recommended Requirements

Intel Pentium 200Mhz Processor  
64 Megabytes Memory  
20 Megabytes Free Hard Disk Space  
Windows 98, ME, NT, 2000 or XP.

## Network Requirements

Runs on Microsoft Windows NT/2000 Server or any other network supported by Microsoft Windows. The program can also be run in stand-alone mode.

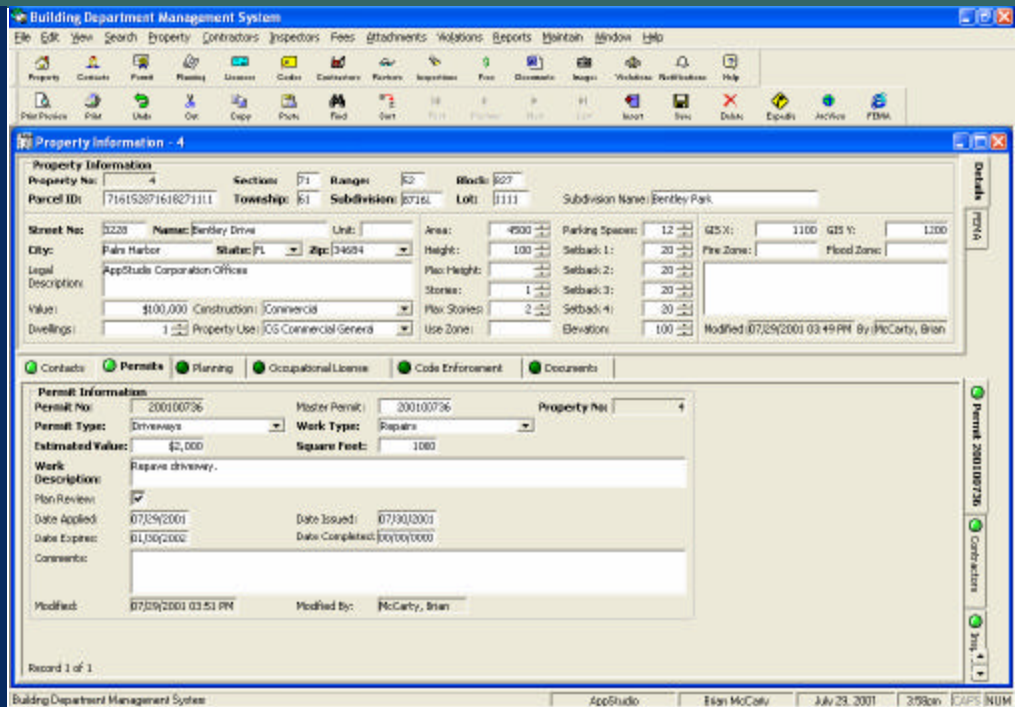

## Data Conversion

If you are upgrading from an existing program, AppStudio can convert your data to the BDMS application.

In addition, AppStudio will customize Permits and License Certificates for your municipality *free of charge!*

## Program Highlights:

- Tracks Property Information, Contacts, Permits, Inspections, Planning and Zoning, Plan Reviews, Occupational Licenses and Code Enforcement.
- Integrated System. Property and Contact information is shared across all modules.
- Generates over 50 reports and graphs including:
  - Permits, Permit Placards, Inspection Forms, License Certificates, Renewal Notices, Delinquent Notices, Cash Receipts and many more.
- Reports can be previewed to the screen before printing and sorted or filtered "on the fly".
- "Lighted" LEDs let you know immediately what data exists for a particular property.
- Notifications remind you of due and overdue items.
- Network Ready. Can run on any Microsoft Windows compatible network and supports unlimited users.
- Program access and security levels can be configured for each user.
- Uses a non-proprietary Microsoft Access database. Can also integrate with Sybase, Oracle or Microsoft SQL Server.
- Lookup values (such as Permit Types) are not hard coded and can be easily modified by the customer.
- AppStudio will design your tractor feed or laser printer certificates free of charge.
- Can be customized for your specific needs.
